Availability: Open to 100% remote roles and freelance projects · **Languages:** Vietnamese for interviews and team collaboration; English for technical reading and writing

PROFESSIONAL SUMMARY

Full-Stack Developer with 5+ years of experience delivering web and mobile applications. Focused on React, Next.js, Node.js, PHP/Laravel, and React Native: from business platforms and custom WordPress websites to enterprise integrations and offline-first mobile apps. Based in Ca Mau, Vietnam; open to 100% remote roles and freelance projects with Vietnamese-speaking teams.

TECHNICAL CAPABILITIES

Frontend	React · Next.js · Vue.js / NuxtJS · TypeScript · React Native / Expo
Backend	Node.js / NestJS · PHP / Laravel · WordPress · Golang · Python / FastAPI
Database & Integration	MySQL / PostgreSQL · MongoDB / Redis · Apache NiFi · Frappe · SQLite

WORK EXPERIENCE

Full-Stack Developer: BlueCoral	2025-01 – Present
- Building SEO-friendly web applications with NuxtJS and ReactJS, alongside custom WordPress websites. - Developing backend services with Golang and integrating business APIs. - Designing enterprise data synchronization with Apache NiFi and Frappe. - Building offline-first POS mobile apps with React Native, Expo, Zustand, and SQLite.	
Full-Stack Developer: Cozwork Joint Stock Company	2020-09 – 2024-08
- Delivered CRM systems, healthcare platforms, and NFC digital business cards. - Led full-stack feature development from concept to deployment. - Optimized database performance across multiple client portfolios. - Awarded "Dedicated Employee of the Year" (December 2023).	

SELECTED PROJECTS & CASE STUDIES

Corporate & Hospitality Websites · Full-Stack Developer · Status: Ongoing	Case Study →
Custom WordPress and responsive frontend work for corporate and hospitality brands, including EtchLab, Ambrosia, and The Myst Sapa. - Responsive Figma-to-code delivery for corporate and hospitality websites. - WordPress theme parity and reusable shared components. - Tablet/mobile layout refinement and optimized image delivery. Stack: WordPress · PHP · JavaScript · HTML5/CSS3 · TypeScript · Vite · ACF · Professional project contribution; client source code is not published.	
AI Chatbot & Workflow Customization · Full-Stack Developer · Status: Ongoing	Case Study →
Custom Dify-based chatbot workflows with interactive forms, carousel responses, embedded chat, and knowledge retrieval for hospitality use cases. - Custom interactive carousel and form workflows on Dify. - Embedded chat rendering and workflow continuation. - Knowledge retrieval for hospitality assistants. Stack: Python · Next.js · Dify · Redis · Docker · RAG · Custom workflows and website integration built on Dify.	
Q-POS Mobile: Offline-First POS · Full-Stack Developer · Status: Live	Case Study →
Modern offline-first Point of Sale mobile app for hospitality with barcode scanning and real-time inventory sync. - Offline-first POS workflows using Expo, Zustand, and SQLite. - Barcode scanning and inventory synchronization for hospitality use cases. Stack: React Native · Expo · TypeScript · Zustand · SQLite · Professional project contribution; client source code is not published.	
S-CRM Sync: Enterprise Data Synchronization · Full-Stack Developer · Status: Live	Case Study →
Real-time enterprise data synchronization platform bridging a PMS and Frappe CRM using Apache NiFi. - PMS-to-Frappe CRM synchronization using Apache NiFi. - Data mapping for reservations, guest profiles, and POS orders. Stack: Apache NiFi · Node.js · Frappe · Jolt · Professional project contribution; client source code is not published.	

W-Dashboard: Drag & Drop Page Builder · [Frontend Developer](#) · **Status: Live**

[Case Study](#) →

Admin dashboard featuring a visual drag-and-drop page builder for composing pages without code.

Stack: React · TypeScript · Vite · Craft.js · Radix UI · TanStack Query · Zustand · *Professional project contribution; client source code is not published.*

Agent Teamwork: AI Coding Orchestration · [Developer](#) · **Status: Developer Tool**

[Case Study](#) →

Personal developer tooling for capability-based AI teamwork, file ownership, resumable sessions, and an OpenCode adapter.

- Built the core teamwork policy engine and OpenCode adapter.
- Added persisted lifecycle state and resume/cancel/status controls.
- Enforced file claims and stopped execution after a dry run.

Stack: TypeScript · Node.js · OpenCode · *Personal developer tooling: core policy engine and OpenCode integration.*

RoboCopy GUI: Local File Operations · [Developer](#) · **Status: Local Tool**

[Case Study](#) →

A React and Node.js interface for Windows robocopy with dual-pane navigation and more deliberate handling of expensive folder operations.

- Implemented dual-pane file operation workflows.
- Moved folder-size calculation to an explicit user action instead of expensive automatic scans.
- Added an item information action and refined pane navigation refresh.

Stack: React · Vite · Node.js · Express · Windows · *Personal application built around the Windows robocopy utility.*

Portfolio Video Workflow: OpenShorts · [Integration Developer](#) · **Status: Developer Tool**

[Case Study](#) →

A local workflow connecting curated case studies, recording briefs, video processing, and approved showcase clips.

- Generate project recording briefs from the same profile used by the portfolio and CV.
- Prepare video processing offline, then submit explicitly to a local OpenShorts instance.
- Export reviewed clips with project attribution into the portfolio.

Stack: Python · OpenShorts · REST API · Hugo · *Portfolio integration built around the upstream OpenShorts platform.*

HONORS & AWARDS

- **Dedicated Employee of the Year:** Cozwork Joint Stock Company (2023-12)
